NEWS

Prestige Medical Imaging is here to help during the COVID-19 Pandemic

NEWBURGH, NY – March, 2020 – Prestige Medical Imaging (PMI) the largest independent provider of digital imaging technology and services for medical facilities, is focused on keeping employees safe while providing healthcare teams with the products they need to continue to treat patients around the country.

“During this unprecedented public health crisis, the courage of doctors, nurses and care teams who are helping patients in the face of this global pandemic are inspirational. Please know our entire organization is extremely committed to combatting the COVID-19 virus in every way we can. Our employees have been working around the clock securing equipment, material and people to deal with the pandemic” said Bill Haussmann, CEO for Prestige Medical Imaging.

Recently PMI has been contracted to supply Portable X-Ray units to be used at testing facilities throughout New York State. PMI is in constant communication and working closely with its essential New York/Long Island suppliers such as: Carestream Health, Source Ray Inc, First Source Inc and Fujifilm USA to ensure the timely manufacturing of these life-saving products. These suppliers have ramped up production and risen to the challenge by adding employees and additional shifts to their production operations to ensure the completion of all the critical systems in a timely manner. To ensure immediate availability to healthcare professionals on the front lines of this fight, PMI engineers from around the country are coming to New York and donating their time to personally install and transport these units. “I will be in the field as well supporting these installs, as I wouldn’t have my team do anything I wouldn’t do” added Bill.

PMI is also supporting the needs of healthcare partners by providing 24/7 remote diagnostic solutions via the latest PMI Touch Technology. This capability will help limit exposure for patients, healthcare staff and PMI employees. During installations and on-site technical support, PMI is following the World Health Organization, Centers for Disease Control and local hospital guidelines to prioritize safety.

Bill adds, “As we navigate through this unpredictable and unprecedented situation together, please know we are here to help in any way we can, at any time. Although PMI is a company headquartered in Newburgh, NY, we also have satellite offices & full support teams in Ohio, Pennsylvania, Connecticut, New Jersey, and Florida that help support the entire Northeast, East Coast, and the Midwest. Our new Arizona location is also ready to go beyond our borders.”
